## SUMMARY

AI Engineer specializing in agentic AI, generative AI, RAG, and LLM applications. Experienced in designing SaaS platforms, Windows applications, AI-powered websites, AI agents, multi-agent workflows, prompt engineering, model fine-tuning, computer vision, and scalable AI solutions. Strong foundation in machine learning and deep learning, with hands-on experience building RAG pipelines, intelligent automation, and production-ready AI applications. Passionate about applying generative AI to solve complex real-world problems and deliver impactful business solutions.

## PROFESSIONAL EXPERIENCE

### AI Engineer

*Sopra Steria*

08/2026 – Present

Toulouse, France

- Prototype agentic and RAG architectures using **LangGraph**, **LangChain** and **Google ADK**, connecting models to knowledge sources and executable tools.
- Integrate generative AI into web and mobile applications, experimenting with memory, retrieval, reasoning and actions.
- Evaluate prototype reliability and explore AI-assisted development workflows for code generation, testing, reviews and documentation.

### Senior Data Scientist (Freelance)

*KHOME*

01/2026 – 07/2026

Paris, France

- Integrate LLMs, generative AI and retrieval capabilities into digital-product features.
- Design RAG pipelines for property-related and regulatory documents.
- Apply structured prompting, function calling and agent orchestration using frameworks such as **LangGraph** and **CrewAI**.

### AI & Automation Engineer

*Havas Group*

02/2025 – 11/2025

Paris, France

- Develop and bring generative AI and agentic solutions into production for business use cases.
- Build AI agents that interact with enterprise applications, document repositories, APIs and automated workflows.
- Connect AI capabilities to existing information systems to automate operational processes.

### Data, Automatisation et Intelligence Artificielle

*Allianz France*

01/2024 – 01/2025

Paris, France

- Design and test automation, generative AI and agentic AI solutions to simplify business processes.
- Build prototypes involving specialised agents, business assistants and orchestrated workflows connecting multiple data sources.
- Automate data collection, analysis, reporting and documentation; measure improvements in efficiency and reliability.

## EDUCATION

n8n, Make, autonomous agents, multi-agent orchestration, RAG engineering, Supabase, Xano, APIs, webhooks, AI-assisted development and application architecture.

Masters in Machine Learning for Data Science (MLSD)

Université Paris Cité

2014 – 2018

Paris, France

Python, deep learning, NLP, generative AI, data engineering, and cloud.

SKILLS

Programming Languages & Web Development

- **Languages:** Python, JavaScript, TypeScript, SQL, HTML, CSS.
- **Frontend & Backend:** React, Next.js, FastAPI, Node.js, REST APIs.
- **AI App & SaaS Builders:** Lovable, Claude Code, Bubble, Replit, Google Console, Cursor.

AI Agents, Automation & Tools

- **Generative AI & Agents:** LangChain, LangGraph, LangSmith, CrewAI, LlamaIndex, OpenAI API, Claude API, Gemini API.
- **Agentic Workflows:** Multi-agent orchestration, tool calling, MCP, memory management, human-in-the-loop validation.
- **Business Automation:** n8n, Make, Zapier, Power Automate, Copilot Studio, Power Apps.
- **RAG & Knowledge Systems:** Document ingestion, chunking, embeddings, semantic search, retrieval evaluation, vector databases.
- **Databases & Integrations:** PostgreSQL, pgvector, Pinecone, Airtable, webhooks, OAuth, Microsoft 365 integrations.
- **Data & Reporting:** Pandas, NumPy, Excel, Power BI, data cleaning, automated reporting.
- **Deployment & Quality:** Git, GitHub, Docker, CI/CD, Azure, Vercel, automated testing, logging, LLM evaluation and cost monitoring.

Business & Soft Skills

- **Process Improvement:** Requirements gathering, process mapping, identifying automation opportunities, prioritising use cases, measuring time savings and ROI.
- **Project Delivery:** Rapid prototyping, MVP development, technical documentation, Agile collaboration.

Communication & Responsible AI

- **Communication & Collaboration:** Explaining technical concepts, stakeholder communication, teamwork, problem-solving, time management.
- **Responsible AI:** Data confidentiality, GDPR awareness, access control, validating AI-generated outputs.

LANGUAGES

English · French · Urdu · Hindi

INTERESTS

Video games, learning new technology.
